Education

Rutgers University

Bachelor of Science in Computer Science

Expected May 2027

New Brunswick, NJ

- **Relevant Coursework:** Data Structures and Algorithms, Software Engineering, Computer Architecture and Assembly, Computer Science I & II, Systems Programming

Experience

ADP

June 2026 – Aug 2026

Application Developer Intern

Manhattan NYC

- * Built a fully autonomous multi agent pipeline requiring no human intervention, converting Figma designs to production ready and accessible React components
- * Migrated 300+ end to end tests from Selenium to Cypress, improving test reliability and unblocking a serialized CI/CD pipeline to enable parallel builds across the team
- * Reduced bundle size by 2.9MB, eliminating the Ramda.js dependency across 400+ files and refactoring to native JavaScript

State of New Jersey Government OOI

Sept 2025 – Dec 2025

Generative AI Intern

NJ (Remote)

- * Expanded NJ's official AI Assistant by grounding it in a 50+ page Medicaid Doula knowledge base, enabling instant, document referenced responses to complex policy questions
- * Developed accessible Next.js web forms mapping directly to Medicaid Doula government PDF applications, streamlining a previously paper heavy legal process for state applicants
- * Achieved WCAG 2.1 Level AA compliance by auditing and remediating web components to meet government accessibility standards for public facing applications

HuggleGroup

Oct 2023 - Aug 2025

Web Development Intern

Denville, NJ (Hybrid)

- * Mitigated legal risk and achieved WCAG 2.1 compliance by leading the front end development of a critical website overhaul
- * Boosted site wide performance by 22% (Google Lighthouse) by optimizing Core Web Vitals and implementing efficient state management
- * Launched a redesigned, user friendly ecommerce platform by collaborating with UI/UX to translate mockups into pixel perfect React components
- * Slashed malicious bot traffic by 95% by integrating Google reCAPTCHA and configuring Cloudflare DNS and DDoS protection

Projects

Stackd | [live](#) | [code](#) | *Next.js, FastAPI, Supabase, Gemini, Stripe, Vercel, Railway*

May 2026 – July 2026

- * Built an AI coaching app where a persona modeled after a public figure the user picks checks in daily, classifies their messages such as check ins, tasks, and journal entries, and replies in that person's voice using Gemini
- * Wrote a shared rules layer that every AI response runs through, so replies stay consistent and do not sound robotic or AI generated no matter which part of the app is talking
- * Set up the full billing flow with Stripe, including a five day free trial that automatically prompts users to subscribe before cutting off access

Technical Skills

Languages: Python, JavaScript/TypeScript, SQL, Java, C

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, FastAPI, Express.js

AI/ML: Generative AI, RAG, Prompt Engineering, OpenAI API, Gemini API

Cloud & DevOps: AWS, Docker, Supabase, Git, CI/CD, Vercel, Railway, Stripe

Concepts: Data Structures & Algorithms, RESTful APIs, OOP, Agile Methodology
